REFLECTION

What is the motivation/insights/information did you gain from this career talk on how the jobs in Information Communication Technology (ICT) is essential to play a meaningful role in industry?

- It is important to know that in a working life, employees to be shown concern by their employer because harmony in the working environment can be achieved. When the well-being of employees is fully taken care of by a large company, success will be achieved as a result of the cooperation provided by the employees. (Aman Sufian Shah bin Shamsuddin / A24CS0046)
- It is learned that skills need to be sharpened by everyone to be able to solve real-world problems, develop impactful solutions, and improve efficiency across industries. Through this, society's well-being can be helped to improve. (Auni Sofia binti Abd Rahman / A24CS0051)
- It has been learned that courage and a willingness to face failure are required when starting a company or a startup, as success cannot be achieved without trying. Confidence and persistence are regarded as the keys to making it happen. (Haritz Haykal bin Nazrul Hisham / A24CS0250)
- As students, helping each other is essential to success together. Leadership skill can also developed in this team working as willing to listen to different perspectives on problem solving. Believe on yourself is very important to encourage personal growth and work towards improvements. (Nur Umairah binti Zamri / A24CS0168)
